PETROLEUM COMMISSION, GHANA

Regulating, Managing & Coordinating Upstream Petroleum Activities

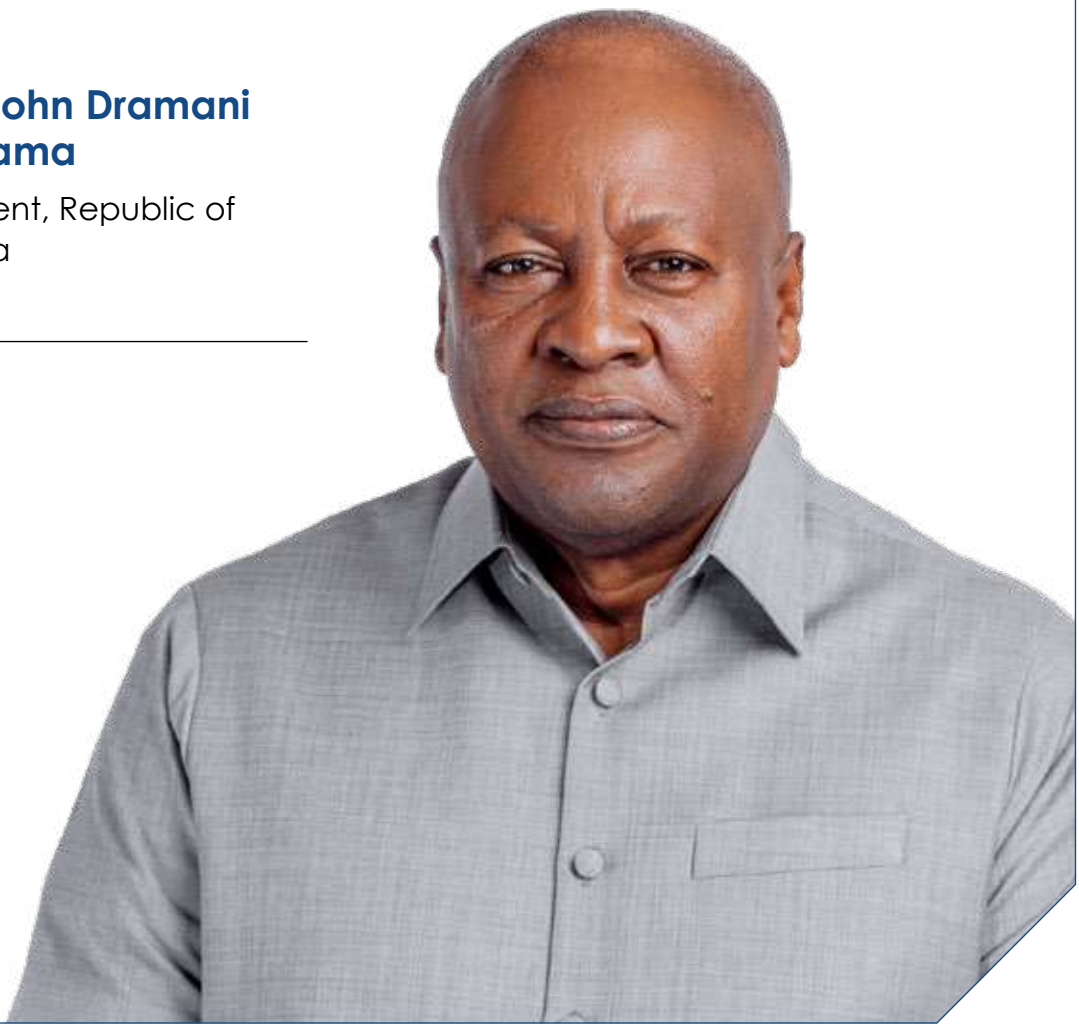
Who We Are

- We are Ghanaian
- Regulator of Ghana's Upstream Petroleum industry
- Custodian of Upstream Petroleum Data
- Manager of Ghana's hydrocarbon resources
- One stop shop for all permits in the Upstream Petroleum Industry
- Gateway to Ghana's Upstream Petroleum Industry
- Facilitator of Ghanaian participation in Upstream Petroleum Industry
- Upstream Agency under the Ministry of Energy, formed by an Act of Parliament, Act 821, 2011

MESSAGE FROM THE PRESIDENT OF THE REPUBLIC



H.E. John Dramani Mahama

President, Republic of Ghana

Ghana's upstream petroleum industry has been a significant driver of economic growth, investment and national development since the discovery of oil in the Jubilee Field in 2007 and the commencement of commercial production in 2010.

Today, however, the industry stands at a defining moment, confronted with declining production and reduced levels of activity. This calls for renewed strategic focus, bold reforms and a collective commitment to repositioning the sector for sustained growth and long-term value creation.

A key priority of my government is therefore committed to reversing these trends through reforms that restore investor confidence, stimulate exploration and production, promote reserve replacement and unlock new opportunities across our sedimentary basins. We are also determined to strengthen the linkages between upstream petroleum activities and the wider economy through investments in refinery, petrochemicals and related industries.

The Government's agenda is to ensure that increased investment translates into greater in-country value creation. Our local content strategy must therefore move beyond participation and ownership considerations towards building technical capabilities, developing competitive Ghanaian enterprises, promoting technology transfer and expanding domestic value addition. Every contract

awarded to a qualified Ghanaian company, every local worker employed and every service procured locally represents an opportunity to retain more value within our economy.

Government remains committed to creating a stable, predictable and competitive investment environment that attracts responsible local and international investors while ensuring that petroleum investments support our national development priorities. We must pursue investments that strengthen local supply chains, create employment opportunities for our youth, develop indigenous capabilities and leave behind lasting economic assets for future generations.

As we advance this agenda, partnerships among Government, regulators, international oil companies, indigenous enterprises, financial institutions and academia will be essential. We must also remain responsive to the changing global energy landscape by promoting innovation, operational excellence, environmental responsibility and sustainable resource management.

Over the past fifteen years, the Commission has played a central role in strengthening regulatory governance, promoting transparency and accountability, and balancing effective statutory oversight with the need to maintain Ghana's attractiveness as an investment destination. Building on these achievements, we must now collectively harness the opportunities within the sector to drive greater investment, deepen local participation and accelerate industrial development.

I encourage participants at this Local Content Conference and Exhibition to engage constructively, forge meaningful partnerships and develop practical solutions that will sustain investment, deepen local content and accelerate industrial development.

God bless us all, and God bless our homeland Ghana.

MINISTERIAL NOTE

Dr. John Abdulai Jinapor (MP)

Minister for Energy & Green Transition

As we convene for the 2026 Local Content Conference and Exhibition under the theme, *"Enriching Local Content for Sustainable Growth: Building a Resilient Upstream Sector through Reforms and Partnerships to Spur Competitiveness and Investment,"* we are presented with an important opportunity to reflect on the progress of Ghana's upstream petroleum industry, explore emerging opportunities and chart a strategic path towards sustainable growth.

Against the backdrop of an evolving global energy landscape, this gathering underscores the need to strengthen local content, deepen strategic partnerships, promote innovation and enhance the competitiveness of our industry to attract investment and unlock greater value for our nation.

The Ministry of Energy and Green Transition is committed to leading the effort to reposition Ghana as a competitive and preferred destination for petroleum investment. Our strategy is underpinned by a comprehensive programme of legislative, regulatory and fiscal reforms designed to improve the attractiveness of our petroleum investment framework, encourage exploration, stimulate new discoveries and accelerate the development of existing resources. We are determined to ensure that Ghana's petroleum resources are explored and developed responsibly, efficiently and in a manner that delivers maximum value to the nation.

Our local content agenda must focus increasingly on technology transfer, skills development, local manufacturing, research and innovation, and the expansion of Ghanaian participation in specialised and high-value segments of the petroleum value chain. We must create an environment in which Ghanaian companies are not merely beneficiaries of local content policies but become capable industry partners, service providers and exporters of petroleum-related expertise

I wish to commend the Petroleum Commission for its remarkable contribution to the development and regulation of Ghana's upstream petroleum industry over the past fifteen years. Through its regulatory oversight, local content implementation, capacity-building initiatives and commitment to transparency and accountability, the Commission has played an indispensable role in strengthening the institutional foundations of our petroleum sector. As it marks its fifteenth anniversary, I encourage the Commission to build on these achievements by continue to strengthen its regulatory efficiency, promoting investor confidence and ensuring that our local content policies deliver measurable and sustainable outcomes.

I encourage all participants at the 2026 Local Content Conference and Exhibition to use this platform to engage constructively, exchange ideas, build strategic partnerships and develop practical solutions that will strengthen Ghana's upstream petroleum industry.

I wish all of you fruitful deliberations and a successful conference and exhibition.

WELCOME ADDRESS

Hon. Joseph Nelson

Western Regional Minister

The Western Region occupies a strategic position in Ghana's petroleum industry, having hosted major upstream petroleum operations and associated infrastructure since the discovery of the Jubilee Field in 2007--from offshore exploration and production, to the Atuabo Gas Processing Plant and the associated gas infrastructure, our region has played a significant role in Ghana's emergence as a petroleum-producing nation.

While the industry has generated employment, stimulated local enterprise development and supported infrastructure growth in the Western Region and beyond, we must acknowledge the challenges associated with declining production, limited local capacity, environmental concerns and the expectations of communities hosting petroleum operations. Our collective responsibility must be to ensure that renewed investments in exploration, production and emerging industrial projects translate into sustainable livelihoods, skills development, meaningful employment and expanded opportunities for local businesses in the Western Region and beyond.

The Western Region remains ready to partner with Government, the Petroleum Commission and industry operators to advance this agenda. We encourage deeper collaboration with traditional authorities, local governments, educational institutions and private sector organisations to strengthen local skills, improve business competitiveness and ensure that host communities are adequately consulted and benefit from industry investments. We also expect the highest standards of environmental protection, operational safety, transparency and responsible community engagement.

As we commemorate fifteen years of the Petroleum Commission, I commend the Commission for its continuous contribution to strengthening regulatory governance and creating opportunities for Ghanaian enterprises and professionals; and ensuring that the Western Region has its first share of employment in the industry, Social Investment Projects and business opportunities. Through its local content initiatives, capacity-building programmes and stakeholder engagements, the Commission has helped position Ghanaian businesses and workers to participate more meaningfully in the petroleum value chain.

As we look towards the next fifteen years, our ambition must be to move beyond the Western Region not remaining as merely a host and beneficiary to petroleum operations but using the petroleum industry to drive industrialisation in the region.

I congratulate the Petroleum Commission on this important milestone and wish all participants fruitful deliberations and a successful 2026 Local Content Conference and Exhibition.

I also extend warm hospitality to all delegates and wish them an enjoyable and memorable stay in Sekondi-Takoradi.

CEO'S NOTE

Ms. Emeafa Hardcastle

Ag. CEO, Petroleum Commission

> ***"I extend my sincere appreciation to Government, our industry partners, indigenous Ghanaian companies, development partners and the dedicated staff of the Commission for their invaluable contributions to our journey."***

It is my pleasure to warmly welcome you to the 2026 Local Content Conference & Exhibition which coincides with the celebration of fifteen years of the Petroleum Commission's establishment and service to Ghana's upstream petroleum industry.

Since its establishment in July 2011, the Commission has evolved into one of the most respected upstream petroleum regulators in the sub-region, playing a pivotal role in strengthening regulation, promoting investment, advancing Ghanaian participation and safeguarding the sustainability of nation's petroleum resources. Through our regulatory oversight, policy contributions and involvement in petroleum agreement negotiations, we continue to promote transparency, operational efficiency and the protection of Ghana's national interests.

Looking ahead, we are intensifying efforts to promote Ghana's hydrocarbon potential, attract responsible investment and unlock exploration opportunities across our sedimentary basins, particularly the Voltaian Basin. Through geological studies, investor engagement and initiatives such as the National Data Repository, we are positioning Ghana for new exploration, discoveries and long-term reserve replacement.

This year's LCCE event is an opportunity to recognise the contributions of indigenous Ghanaian companies, industry operators and professionals, while renewing our collective commitment to deeper local participation, skills development, technology transfer and a more competitive upstream petroleum industry.

I extend my sincere appreciation to Government, our industry partners, indigenous Ghanaian companies, development partners and the dedicated staff of the Commission for their invaluable contributions to our journey.

Once again, I warmly welcome you to the 2026 LCCE. May our engagements foster stronger partnerships, create greater opportunities for Ghanaian businesses and advance the sustainable development of our petroleum resources.

Together, let us celebrate fifteen years of progress and build an even stronger future for Ghana's upstream petroleum industry.

ConShip
CONSOLIDATED SHIPPING AGENCIES LTD

As we celebrate our landmark 30th anniversary, Consolidated Shipping Agencies Ltd (Conship) proudly marks three decades of excellence, innovation, and reliability within Ghana's logistics industry. Founded in 1996 by Dr. M.C. Vasnani, Conship is a wholly indigenous Ghanaian-owned logistics and freight forwarding leader. From humble beginnings, we have grown into a trusted global partner with operations spanning Accra, Tema, Takoradi, the USA, Canada, and Rwanda, connecting clients to over 3,000 seaports and airports worldwide.

Our comprehensive services include Freight Forwarding, Transport and Haulage, Customs Brokerage, Shipping Agency Representation, and Marine Project Management, driving success across vital sectors like Oil and Gas, Mining, Energy, Pharmaceuticals, and Manufacturing. Backed by full industry accreditation, Conship has powered transformative national projects, such as the West African Gas Pipeline and Ghana's pioneering FPSOs—the Kwame Nkrumah and the Atta Mills. Driven by continuous innovation, our infrastructure features a 3,500 sqm European-standard warehouse and a 10,000 sqm ultra-modern asset facility at the Tema Free Zones Enclave. As we celebrate 30 years of impact, Conship remains steadfast in setting the benchmark for seamless, world-class logistics solutions.

OUR MISSION

To professionally manage freight forwarding and logistics services, delivering reliability, efficiency, and excellence.

OUR VISION

Succeeding together with passion — fostering strong partnerships and shared growth.

HPI-GEVAQ GHANA LIMITED

HPI-GEVAQ Ghana Limited, is a Joint-Venture (JV) company incorporated under the Laws of the Republic of Ghana. Presently, HPI-GEVAQ provides highly specialized and essential services for Tullow Ghana Limited (TGL) and MODEC Production Services Ghana JV Limited (MPSG), on the MV21 FPSO Kwame Nkrumah and MV25 FPSO Professor John Evans Atta Mills, that is, the maintenance of the Gas Turbines on the MV21 and MV25 FPSOs.

Ensuring uninterrupted electricity supply on FPSOs makes the services provided by HPI-GEVAQ on two FPSOs in Ghana to be considered as highly specialized and an essential service.

HPI-GEVAQ is an international rotating equipment solutions provider for the Oil & Gas, Power Generation and Marine Sectors. In the Oil & Gas Sector, we provide an array of services to the upstream, midstream and downstream sub-sectors of the Oil & Gas industry. In the Power Generation Sector, we deliver turnkey solutions to plan, design, construct and operate power plants and improve the performance and reliability of turbines, high speed rotating equipment, pumps and compressors. In the Marine Sector, we provide whole life-cycle assessments, EPC of marine power generation solutions, shipboard machinery control, Integrated Platform Management Systems (IPMS) and propulsion control systems for marine applications.

HPI-GEVAQ specializes in five (5) key areas, i.e., Engineering, Procurement & Construction (EPC) fast track solutions for turnkey power generation projects; Cyber Security and Compliance solutions to meet both business and regular challenges; Operations & Maintenance (O&M) solutions to reduce life cycle costs and improve performance; Maintenance, Repair, Overhaul & Controls solutions for rotating equipment; and Marine EPC power generation solutions, shipboard machinery control, IPMS and propulsion control systems.

EXHIBITORS

OMA Group is a leading African provider of shipping, energy, logistics, and marine services, delivering integrated solutions across key industries and operating in nine African countries. With international partners such as TGS and Yinson.

TGS provides scientific data, intelligence, advanced processing, analytics, and cloud-based solutions to support companies in the energy sector.

Yinson Production is a leading global FPSO owner and operator, recognized for strong project execution, safety, uptime, and sustainable FPSO designs.

BAJ FREIGHT AND LOGISTICS LTD is an indigenous Ghanaian company that has unparalleled experience and in-depth expertise in providing International Freight Forwarding, Logistics, Customs Brokerage, and Ship Agency Services. As an ISO-certified company, Bajfreight employs industry best practices to meet, and even exceed the expectations of customers. We are firmly committed to safety, transparency, excellence, efficiency, regulatory compliance, and cost-effectiveness.

SLB (NYSE: SLB) is a global technology company that has driven energy innovation for 100 years. With a global footprint in more than 100 countries and employees representing almost twice as many nationalities, we work each day on innovating oil and gas, delivering digital at scale, decarbonizing industries, and developing and scaling new energy systems that accelerate the energy transition. Find out more at slb.com.

Greenwood Supply Services is a leading maritime and offshore catering company established in 2015. With operations in Ghana(Tema & Takoradi), Namibia (Walvis Bay & Luderitz), and Guyana(George Town) Greenwood provides high-quality food supply, logistics, and camp management services to the oil, gas, and mining industries. The company is driven by a strong commitment to local content, quality, and community development.

Energy projects succeed when partners deliver. Lubrimax Ghana Limited is an indigenous Ghanaian company and the current Project Management Consultant to GNPC-Explorco for the Voltaian Basin drilling campaign.

Lubrimax, a trusted provider, supplies high-performance industrial lubricants, chemicals and delivers technology-driven inventory, asset and fleet visibility, supporting efficient and reliable industrial operations across West Africa through quality products and service

Ensol Group Ltd is a wholly Ghanaian-owned holding company operating through its four subsidiaries: Southey Contracting Ltd, Ensol Energy Ltd, Ensol Engineering & Technology Ltd, and 2EN Chemicals Ltd. Together, we provide industrial maintenance, inspection, chemical management, engineering consultancy, asset integrity, and project support services to the oil and gas, mining, power, and construction sectors across Ghana and West Africa.

Integrated Logistics, Procurement, Engineering & Chemical Solutions For Africa

- LOGISTICS / PROCUREMENT
- ENGINEERING / CONSTRUCTION
- CHEMICAL SOLUTIONS
- MINING

Meridian Group is a fully-Ghanaian owned business group with experience across logistics, engineering, oil and gas, mining, infrastructure and industrial services. Through Meridian Logistics & Engineering (MLE) and Eco Natural Resources (ENR), the Group provides a range of services, including **port and terminal logistics, haulage, engineering and project delivery, procurement, and chemical sourcing, blending and supply.**

With a **strong understanding of the local market and a focus on quality, safety and efficiency**, Meridian Group works closely with clients to deliver practical, reliable solutions that meet their needs. The Group is committed to building lasting business relationships, supporting industrial development and contributing to economic growth in Ghana and the wider region.

01

Meridian Logistics and Engineering

Established in 2006, MLE is a Ghanaian-owned logistics and engineering business with experience in port operations and oil and gas project delivery.

- Container shunting and terminal logistics at Tema Port
- Haulage, heavy equipment and industrial material movement
- Engineering, procurement, construction and commissioning support
- Industrial procurement of chemicals, equipment and spare parts

Eco Natural Resources

02

Established in 2009, ENR is a 100% indigenous Ghanaian company focused on chemical products and services for oil and gas, mining, energy, textiles and other industries.

- Production and industrial chemical sourcing and supply
- Chemical management and supply-chain coordination
- Blending, storage, decanting and packaging capability in Takoradi
- Supplier qualification, product sourcing and logistics

Selected Experience

Oil & Gas Projects
MEG reception and handling for Jubilee and TEN field pipeline operations; standby de-ethaniser overhead compressor installation; Anokyi Mainline Compressor Station for Ghana Gas.

Port & Haulage
Container shunting and terminal support at Tema Port, plus haulage and heavy-equipment services for industrial and bulk-material customers.

Chemical Capability
Chemical sourcing and supply for production and industrial applications, supported by ENR's Takoradi blending, storage and packaging operations.

Project Experience & Capabilities

Port & Terminal Logistics
Container-terminal support and port logistics operations.

Haulage & Heavy Equipment
Fleet capability supporting industrial and bulk-material movements.

Chemical Operations
Eco Natural Resources' operational facility and chemical-handling capability.

Engineering & Industrial Projects
Engineering and industrial delivery experience across the project lifecycle.

Our approach

We are committed to delivering reliable services and practical technical solutions that meet our clients' needs. Through effective coordination of our people, equipment, materials and project activities, we strive to ensure efficient and dependable project delivery. Quality, health, safety and environmental responsibility remain central to how we plan and carry out our operations.

GREENWOOD
Supply Services

ABOUT US

Greenwood Supply Services is a premier food supply and distribution company committed to delivering quality, freshness, and ethically sourced products to the culinary world. Since our inception in 2015, we have grown into a trusted partner for hospitality, maritime, corporate, and oil and gas clients across Ghana and Namibia. Our selected approach ensures that we source the finest ingredients from local and global producers, maintaining strict quality and food safety standards.

With a focus on customer satisfaction, we offer customized procurement solutions, advanced inventory management, and expert menu development support. Our logistics excellence guarantees timely and reliable deliveries, even in the most challenging conditions. Whether serving world-class hotels, top tier restaurants, oil and gas companies, or large-scale corporate operations, Greenwood is dedicated to fuelling culinary excellence at every step.

OUR SERVICES

Greenwood Supply Services offers a comprehensive range of services, including:

FOOD SUPPLY & DISTRIBUTION

We supply quality food products and essentials from world-renowned brands to offshore rigs, mining camps, and remote sites. With global sourcing and efficient distribution, we deliver fresh, safe, and cost-effective supplies tailored to your needs.

OFFSHORE/ONSHORE CATERING AND HOUSEKEEPING

We provide nutritionally balanced, high-quality meals that meet strict food safety standards, whether offshore or in corporate settings. Our catering solutions support workforce productivity with variety and quality, while our housekeeping and laundry services ensure clean, safe, and hygienic environments that meet industry standards.

EVENT & CORPORATE CATERING

We provide bespoke corporate catering tailored to your staff and event needs. Greenwood's team of skilled chefs offers a wide range of international cuisines to suit every palate.

CREWING & MANPOWER

TG-GeoPartners JV is a Joint-Venture partnership between GeoPartners Limited, UK, TG Geoscience Engineering Services Limited and Integrated Geoscience Limited, Ghana. We are an indigenous geophysical consultancy company specialising in Upstream exploration and we provide a logistic support base to better assist our clientele in the Oil & Gas sector and in mineral exploration within the West African sub-region.

TG-GeoPartners' main business activities or expertise include upstream (onshore and offshore oil activities), downstream oil service needs, aviation handling, training, research, oil sector consulting, environmental assessments, geographical database management, geological mapping services, geodetic engineering and project management and logistics support.

TG-GeoPartners JV together with our technical associates are the main partners of the Petroleum Commission for the 3D Multi-Client Geophysical Survey in ultra-deep waters of the Accra - East Keta Basin.

United Bank for Africa Ghana Ltd, a subsidiary of UBA Group Plc, provides corporate, commercial, SME and retail banking services. With 31 branches and over 60 ATMs across Ghana, UBA serves diverse customers. Operating across 20 African countries and international markets, UBA is committed to superior value, professional excellence, ethical standards and becoming Africa's leading financial services institution.

Established in 2008, **Omni Energy** is a wholly indigenous Ghanaian company providing value-added oilfield support services to the upstream petroleum sector. Operating in Ghana and Côte d'Ivoire, we deliver drilling, production and completion chemicals, lifting solutions, equipment rental, inspection and testing services. Our ISO-certified operations reflect our commitment to quality, safety, operational excellence and reliable service delivery across Africa.

Orsam Energies is a leading industrial, energy and environmental service company in Ghana and has been supporting the industry in the realization of major projects over the years. With a wide range of expertise, we bring global engineering, procurement, construction, and commissioning solution to the oil & gas sector in Ghana. Our main activities include steel construction, piping & structural construction, tank construction, pipeline, electrical & instrumentation (E&I) design, and onshore & offshore installation services, maintenance and revamping (brownfield) work. Our operation base/yard is in the heart of the Western Region, Takoradi with administrative office in Accra.

SOH Energy an indigenous, triple ISO-certified company delivering integrated upstream and downstream services—from drilling and production support to equipment, material and manpower supply. We provide major construction, pipeline services and integrity testing. We also supply refined petroleum products to OMCs. Through iDPRS, our innovation lab, we have developed intelligent AI and data-driven solutions to address real challenges across the energy industry.

Our core services

- Asset Integrity and RBI Inspection Management inc API 510 / 570 / 580
- Multi-disciplined IRATA accredited Rope Access services
- Conventional and advanced NDT
  - MPI, DPI, UT, RT and Eddy Current
  - DRT (Digital Radiography) IRIS, PAUT, TOFD, ACFM and LRUT
- Offshore FPSO repair and maintenance services
- OCTG inspections to DS Cat 1-5, API and NS1/2
- Class surveys (ABS and DNV)
- LEEA qualified lifting inspections, DROP's surveys, rigging and lift management
- Pressure testing and callibration
- Onsite wire rope sling manufacturing facilities
- Fabrication and fabric maintenance
  - Piping and structural fabrication
- Complex onshore / offshore projects including
  - Super Duplex subsea spool manufacturing
  - Topsides structural and pipework replacement
  - Rig refurbishment and maintenance
  - Ultrasonic Impact Treatment (Fatigue remediation) and Hull repair
- Offshore laser 3D surveys
- Multi-disciplined detailed engineering
- Scaffolding
- Offshore crewing
- Technical manpower provision

Major projects

In addition to the core services listed, GRO Oilfield Alliance Ghana are often involved in executing large and complex projects for our clients. These typically combine several of our core services and include end to end project management. Example of these case studies can be found on our website **gro-gh.com**

Noble Corporation is a leading global offshore drilling contractor. Noble is forging ahead with a century of earned trust. We have the exceptional people, global and diverse fleet, technology, and operational excellence to serve our customers safely and responsibly in the toughest deepwater environments. Noble is leading with confidence to be the First Choice Offshore® for employees, customers, and investors.

Tullow is an independent energy company focused on building a better future through the responsible development of its oil and gas assets in Ghana. The company is listed on the London and Ghana stock exchanges.

Tullow has reshaped its portfolio around a Ghana-focused operating platform spanning the offshore Jubilee and TEN fields.

Tullow has operated in Ghana since 2006, working in partnership with GNPC, Kosmos Energy, GNPC Explorco and PetroSA.

Recently, Ghana extended the petroleum agreements of Tullow and its partners to 31 December 2040, enabling up to US$2 billion investment and new subsea infrastructure.

Tullow also invests in the communities where it works, supporting education, infrastructure and livelihood development across Ghana's Western Region.

Jean-Medard Madama is Managing Director of Tullow's subsidiary in Ghana.

Genesis Oil & Gas Services is a wholly indigenous Ghanaian infrastructure-backed oilfield services company that supplies critical resources and delivers technical solutions to energy companies operating in Africa.

We focus on solving the problems of clients in the energy industry by providing the facilities, resources and technical expertise to support their operations throughout the natural resource lifecycle – from exploration and appraisal, through to development, production and decommissioning.

Founded in 1919, Halliburton is one of the world's leading providers of products and services to the energy industry. We create innovative technologies, products, and services that help our customers maximize their value throughout the life cycle of an asset and advance a sustainable energy future.

WEC is a 100% Ghanaian-owned construction company, established in 2000 and ISO certified. We specialize in providing comprehensive solutions for both offshore and onshore oil and gas projects. Our expertise includes the fabrication and installation of structural steelworks, subsea components, tank construction, and piping solutions. With experienced manpower and a CNC-equipped 65,000m² fabrication yard, WEC delivers unparalleled innovation and capacity to meet the demands of complex oil and gas projects.

GLICO General Insurance LTD, established in 2002, is a leading non-life insurer in Ghana and a subsidiary of the GLICO Group. We provide innovative, tailored insurance solutions to individuals and businesses, backed by prompt claims payment and exceptional customer service. Guided by strong corporate governance, we remain committed to protecting livelihoods, empowering communities, and delivering on our promises nationwide.

The Ghana National Petroleum Corporation (GNPC) was established by GNPC Law, 1983 (PNDC Law 64), with the primary object of undertaking the exploration, development, production and disposal of petroleum. GNPC started operations in 1985 and leads Ghana's search for adequate and reliable supply of petroleum products.

The Petroleum (Exploration and Production) Act, 2016, Act 919, (which replaced PNDC Law 84 of 1984), provides the regulatory framework for the exploitation of the country's hydrocarbon resources.

GNPC is an anchor partner in all upstream operations and currently has stakes in 17 Petroleum Blocks and is undertaking exploration activities in the Voltaian Basin.

GNPC Foundation is GNPC's subsidiary executing the Corporation's CSR under three pillars: Education and Training; Environment and Social Amenities; and Economic Empowerment.

GNPC is a joint venture partner in GNPC-Technip Engineering Services Limited (G-TES), with 30% stake. GNPC holds 90% stakes in Prestea Sankofa Gold Limited, with the Government of Ghana, 10%.

AI Energy Group is a leading indigenous energy company providing petroleum product supply, logistics, marine bunkering, and integrated energy solutions across Ghana. Our services include quality fuel distribution, retail station operations, marine fuel supply, offshore and in-port bunkering, and logistical support. We serve commercial, industrial, mining, and marine customers, delivering reliable solutions with safety, efficiency, quality, and environmental responsibility at the core.

Baker Hughes is an energy technology company that provides solutions to energy and industrial customers worldwide.

Conducting business in over 120 countries and approximately 58,000 employees, we design, manufacture, and deliver leading technology solutions for our customers. Powered by the industry's only end-to-end technology portfolio, and enabled by our people and scale, we drive productivity and improve outcomes for ourselves and our customers.

From the first rotary drill bit to the world's most extensive portfolio of compressors and gas turbines, and from digital solutions that predict outcomes to modular deep-water technology, for more than a century our inventions have been revolutionizing the industry.

We are reducing the carbon intensity of our operations, applying proven low-carbon technology to help our customers meet their environmental goals, and innovating for the future of energy.

At Baker Hughes, we are rewriting The Energy Equation™, making energy safer, cleaner, and more efficient for people and the planet. Visit us at bakerhughes.com.

Gas for Powering Development.

Cleaner burning
Natural gas produces less carbon dioxide, sulfur, and particulates. That means less air pollution and lower greenhouse gas emissions.

Higher efficiency
Gas converts to useful energy more efficiently, especially in power generation (e.g., gas turbines and combined-cycle plants).

Lower processing needs
Gas often needs less processing before it can be used directly.

Versatile uses
Gas works well for electricity, heating, cooking, and industrial processes.

Gas is essencial because it delivers energy more cleanly and efficiently, with lower environmental impact and greater operational flexibility.
